

FIRST QUARTER REPORT June 30, 2003

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

#### **Operating Results**

Net investment income

The Company's net investment income in the first quarter of fiscal 2004 was \$3,755,000 compared to fiscal 2003 net investment income of \$3,989,000. On a per common share basis, net investment income for the quarter decreased to \$0.30 in fiscal 2004 from \$0.32 in fiscal 2003.

Foreign dividend income in the quarter amounted to \$3,685,000 compared to \$3,216,000 in fiscal 2003. Canadian dividend income amounted to \$1,617,000 in the current quarter compared to \$1,875,000 in the prior year. Interest income amounted to \$325,000 compared to \$172,000 in fiscal 2003. The increase in interest income is attributable to the securities lending program initiated in the fall of 2002.

Operating expenses in the quarter amounted to \$601,000 (2003 - \$707,000).

Net gain (loss) on investments

The Company's net realized gain and change in unrealized appreciation of investments for the quarter ended June 30, 2003 was a net gain of \$48,810,000 compared with a net loss of \$59,102,000 in the quarter ended June 30, 2002. The performance of the investment portfolio reflects that most equity markets posted double digit returns (in local currency) in the current quarter. However, the return of the Company's investment portfolio was adversely effected by the strength of the Canadian dollar against most currencies. In the quarter ended June 30, 2002, the negative return was derived from a general decline across most investment sectors. In particular, however, our investment in Worldcom Inc. led the decline.

The investment portfolio of the Company is comprised of a mix of high and low yielding foreign and Canadian investments. Net investment income, net realized gain (loss) on investments, net change in unrealized appreciation of investments and net asset value per share will vary significantly from period to period depending on the investment mix which moves with the constantly changing economic environment.

## **Dividends**

Regular quarterly dividends were paid on our preferred and common shares. Dividends paid out of net investment income on the preferred shares were \$0.37 per share and \$0.20 per share on the common shares. These dividend payments are consistent with the prior year.

During the comparable period, the TSX 300 Total Return Index increased 10.6% and the MSCI World Index (C\$) increased by 8.0%.

## **Liquidity and Capital Resources**

Liquidity refers to the Company's ability to maintain a cash flow adequate to fund operations and capital investments on a timely and cost efficient basis. The objective of the Company is to earn an above average rate of return primarily through long-term capital appreciation and dividend income. The investment portfolio will be invested principally in equities. From time to time, however, assets of the Company may be invested in interest bearing short-term securities pending the selection of suitable equity investments. The Company's income from operations after payment of taxable dividends is used to fund operating costs as well as provide resources for additional investments.

United Corporations Limited has always been a vehicle for long term growth through investment in common equities. Management believes that over long periods of time, common equities as an asset class will outperform fixed income instruments or balanced funds.

As the fund's investment philosophy is of a long-term nature, short-term volatility is expected and tolerated. We remain confident that our investment strategy will reward our shareholders over the long-term.
