

FIRST QUARTER REPORT June 30, 2004

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Section 4.3(3)(a) of National Instrument 51-102, *Continuous Disclosure Obligations*, provides that if an auditor has not performed a review of the interim financial statements, the interim financial statements must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The Company's external auditors, PricewaterhouseCoopers LLP, have not performed a review of these interim financial statements of United Corporations Limited.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Operating Results

Net investment income

The Company's net investment income in the first quarter of fiscal 2005 was \$4,239,000 compared to \$3,755,000 in the first quarter of fiscal 2004. On a per common share basis, net investment income for the quarter increased to \$0.34 in fiscal 2005 from \$0.30 in fiscal 2004.

Foreign dividend income in the quarter amounted to \$4,734,000 compared to \$3,685,000 in fiscal 2004. Canadian dividend income amounted to \$1,597,000 in the current quarter compared to \$1,617,000 in the prior year. Interest income amounted to \$236,000 compared to \$325,000 in fiscal 2004.

Operating expenses in the quarter amounted to \$834,000 compared to \$601,000 in the prior year. The rise in expenses from the prior year was mainly due to an increase in administration fees, management fees and custody fees.

Net gain on investments

The Company's net realized gain and change in unrealized appreciation of investments for the quarter ended June 30, 2004 was a net gain of \$13,510,000 compared with a net gain of \$48,810,000 in the quarter ended June 30, 2003. In the quarter ended June 30, 2004, the investment portfolio generated positive returns in the United States, Europe and Canada which more than offset the negative returns in Asia. The performance of the portfolio was increased by the weakening of the Canadian dollar relative to the U.S. dollar, British Pound and Euro. In the quarter ended June 30, 2003, most equity markets posted double digit returns (in local currency). However, the return of the Company's investment portfolio was adversely effected by the strength of the Canadian dollar against most currencies.

In the quarter ended June 30, 2004, the Company has hedged a portion of its exposure to the U.S. dollar by entering into forward currency contracts. While the performance of the Canadian dollar has been somewhat volatile, the Canadian dollar depreciated in the current quarter relative to the U.S. dollar. Consequently, the use of forward currency contracts has resulted in a loss of approximately \$1,200,000.

The investment portfolio of the Company is comprised of a mix of high and low yielding foreign and Canadian investments. Net investment income, net realized gain (loss) on investments, net change in unrealized appreciation of investments and net asset value per share will vary significantly from period to period depending on the investment mix which moves with the constantly changing economic and political environment.

Dividends

Regular quarterly dividends were paid on our preferred and common shares. Dividends paid out of net investment income were \$0.37 per share on the preferred shares and \$0.20 per share on the common shares. These dividend payments are consistent with the prior year.

Assets

Total assets at June 30, 2004 are \$800,502,000, which is an increase of 2.1% from the total assets of \$783,752,000 at March 31, 2004. The cost of foreign securities at June 30, 2004 was \$450,784,000, an increase from \$435,204,000 at March 31, 2004. The market value of foreign equities at June 30, 2004 was \$462,728,000 compared to \$437,728,000 at March 31, 2004. The cost of Canadian equities decreased in the first quarter of fiscal 2005 to \$177,475,000 from \$180,671,000 at March 31, 2004. The market value of Canadian equities at June 30, 2004 was \$305,520,000 compared to \$308,174,000 at March 31, 2004.

Overall, the Company's net equity value per share increased to \$62.57 at June 30, 2004 from \$61.32 at March 31, 2004. Based on the reinvestment of distributions at month-end net equity values, the Company's value per share increased by 2.4% in the three months ended June 30, 2004. During the comparable period, the TSX 300 Total Return Index was relatively unchanged, the MSCI World Index (C\$) increased by 3.2% and the S&P500 Index (C\$) increased 4.0%.

Risks

The Company faces a broad range of risks and uncertainties in managing a global equity portfolio. The market risk refers to the risk of loss from the investment and trading activities of the Company due to changes in equity prices, foreign currency rates, interest rates and market volatility.

The external investment portfolio of the Company is managed by Jarislowsky Fraser Limited ("Jarislowsky") and Sanford C. Bernstein & Co. Inc., LLC ("Bernstein"), a wholly owned subsidiary of Alliance Capital Management L.P. Jarislowsky commenced operations in 1955 while Bernstein was founded in 1967. Each of the managers has a global equity mandate and is allowed to hedge the foreign currency exposure of any non-Canadian investments.

The Company also manages a portion of the investments in the portfolio. The securities managed by the Company are investments in Algoma Central Corporation and the Emerging Markets Investors Fund.

Liquidity and Capital Resources

Liquidity refers to the Company's ability to maintain a cash flow adequate to fund operations and capital investments on a timely and cost efficient basis. The objective of the Company is to earn an above average rate of return primarily through long-term capital appreciation and dividend income. The investment portfolio will be invested principally in equities. From time to time, however, assets of the Company may be invested in interest bearing short-term securities pending the selection of suitable equity investments. The Company's income from operations after payment of taxable dividends is used to fund operating costs as well as provide resources for additional investments.

United Corporations Limited has always been a vehicle for long term growth through investment in common equities. Management believes that over long periods of time, common equities as an asset class will outperform fixed income instruments or balanced funds.

As the fund's investment philosophy is of a long-term nature, short-term volatility is expected and tolerated. We remain confident that our investment strategy will reward our shareholders over the long-term.
