MANAGEMENT'S DISCUSSION AND ANALYSIS

Operating Results

Net investment income

The Company's net investment income in the third quarter of fiscal 2005 was \$2,971,000 compared to fiscal 2004 net investment income of \$2,418,000. On a year to date basis, the net investment income increased to \$9,861,000 in fiscal 2005 from \$8,703,000 in fiscal 2004. On a per common share basis, net investment income for the quarter increased to \$0.24 in fiscal 2005 from \$0.19 in fiscal 2004 and on a year to date basis to \$0.79 in fiscal 2005 from \$0.69 in fiscal 2004.

Foreign dividend income in the third quarter increased to \$2,662,000 in fiscal 2005 from \$1,661,000 in fiscal 2004 and to \$9,682,000 in fiscal 2005 from \$7,402,000 in fiscal 2004 on a year to date basis. The Company received special dividends from both InterContinental Hotels Group plc of \$585,000 and Microsoft Corporation of \$514,000 in the third quarter of fiscal 2005. Canadian dividend income in the third quarter increased to \$1,758,000 in fiscal 2005 from \$1,623,000 in fiscal 2004 and to \$4,936,000 in fiscal 2005 from \$4,565,000 in fiscal 2004 on a year to date basis. Interest income in the third quarter amounted to \$129,000 in fiscal 2005, compared to \$297,000 in fiscal 2004 and decreased to \$537,000 in fiscal 2005 from \$1,050,000 in fiscal 2004 on a year to date basis. The reduction in interest income reflects both the decrease in short-term investments held and the decrease in interest rates during the period.

Operating expenses in the quarter amounted to \$784,000 (2004 - \$632,000) and to \$2,400,000 (2004 - \$1,843,000) on a year to date basis. The rise in expenses from the prior periods is mainly due to an increase in administration fees, management fees and custody fees.

Net gain on investments

The Company's realized gain and change in unrealized appreciation of investments for the quarter ended December 31, 2004 was a net gain of \$40,361,000 compared with a net gain of \$56,234,000 in fiscal 2004. On a year to date basis, the Company earned a net gain of \$42,948,000 in fiscal 2005 compared to a net gain of \$123,958,000 in fiscal 2004. The performance of the investment portfolio has been led by the Canadian equities in both the third quarter and on a year to date basis. Investments in foreign markets generally performed positively in the third quarter with increases in European, Japanese and U.S. equities being most prominent. During the quarter, the continued appreciation of the Canadian dollar relative to the U.S. dollar had a negative impact on the investment portfolio. On a year to date basis, the Canadian dollar has appreciated relative to the U.S. dollar, British Pound and Japanese Yen. The Company continued to mitigate its exposure to U.S. dollar denominated investments by utilizing forward currency contracts. The use of forward currency contracts resulted in a gain of approximately \$4,126,000 in the third quarter of fiscal 2005 and a gain of approximately \$6,348,000 on a year to date basis.

The investment portfolio of the Company is comprised of a mix of high and low yielding global investments. Net investment income, net realized gains (losses) on investments, net change in unrealized appreciation of investments and net asset value per share will vary significantly from period to period depending on the investment mix which moves with the constantly changing economic environment.

Performance

The net equity value of the Company's common shares is determined by deducting the outstanding preferred shares at their cost of redemption from the net assets. Net equity value per common share is the net equity value divided by the number of common shares outstanding. For the quarter ended December 31, 2004, the Company's net equity value per share increased to \$65.03 from \$61.68 at September 30, 2004, an increase of 5.8% (based on the reinvestment of distributions at month-end net asset values). For the comparable period, the S&P/TSX Composite Index increased 7.2%, the MSCI World Index (C\$) increased 6.6% and the S&P 500 Index (C\$) increased 4.0%.

On a year to date basis, the net equity value per share of the Company increased to \$65.03 at December 31, 2004 from \$61.32 at March 31, 2004, an increase of 7.0% (based on the reinvestment of distributions at month-end net asset values). Risks

The Company faces a broad range of risks and uncertainties in managing a global equity portfolio. The market risk refers to the risk of loss from the investment and trading activities of the Company due to changes in equity prices, foreign currency rates, interest rates and market volatility.

The external investment portfolio of the Company is managed by Jarislowsky Fraser Limited ("Jarislowsky") and Sanford C. Bernstein & Co. Inc., LLC ("Bernstein"), a wholly owned subsidiary of Alliance Capital Management L.P. Jarislowsky commenced operations in 1955 while Bernstein was founded in 1967. Each of the managers has a global equity mandate and is allowed to hedge the foreign currency exposure of any non-Canadian investments.

The Company also manages a portion of the investments in the portfolio. The securities managed by the Company are investments in Algoma Central Corporation and the Emerging Markets Investors Fund.

Liquidity and Capital Resources

Liquidity refers to the Company's ability to maintain a cash flow adequate to fund operations and capital investments on a timely and cost efficient basis. The objective of the Company is to earn an above average rate of return primarily through long-term capital appreciation and dividend income. The investment portfolio will be invested principally in equities. From time to time, however, assets of the Company may be invested in interest bearing short-term securities pending the selection of suitable equity investments. The Company's income from operations after payment of taxable dividends is used to fund operating costs as well as provide resources for additional investments.

United Corporations Limited has always been a vehicle for long term growth through investment in common equities. Management believes that over long periods of time, common equities as an asset class will outperform fixed income instruments or balanced funds.

As the fund's investment philosophy is of a long-term nature, short-term volatility is expected and tolerated. We remain confident that our investment strategy will reward our shareholders over the long-term.
